

## Plasma Pen

Price: £300

### Summary:

Plasma Pen also known as Fibroblast is a skin tightening, non-surgical treatment. With the use of plasma energy, a thermal effect is created causing excess skin to shrink and to tighten. This course is great for therapists who want to offer skin tightening treatments without the use of injectables on areas such as the eyelids, smoker/ mouth lines and stretch marks.

Accreditation: CPD

Useful information:

Once you have enrolled onto the course and paid the course fee, you will be sent the manuals and questionnaire.

The questionnaire must be completed as home study and emailed back to your tutor to check you have passed the first part of the course.

You must print and bring the manual to the practical session upon completing the questionnaire.

Products and equipment are provided on the day.

For the practical session you will need to show that you can confidently complete the techniques.

If you fail the practical session another training day will be rearranged, you will be charged for this.

Once the practical session is complete you will be sent the certificate via email.

Course duration may vary depending on learning speed and class size.

As your course is accredited this will allow you to gain insurance, work self-employed in a salon, from home or mobile.

Classes are up to four students.

During group sessions you will work on each other.
